

"We were able to more than double our business when we switched to ATSI's web-based transcription service"  
 - A Large Midwest Imaging Center

"We had problems with a previous transcription service and were backlogged almost a month. When ATSI took over our account, they not only caught us up quickly, but they stay on time!"  
 - A Large Eastern Orthopedic Provider

"With ATSI, what you see is what you get. We offer customers full control of their dictations and transcriptions, so turn-around time is fast and accurate. ATSI is fully committed to customer satisfaction. We give you full control of your reports and remove the stresses of guessing. When you begin your relationship with ATSI, you are no longer a spectator!"  
 - David Shepard, CEO ATSI

How it Works

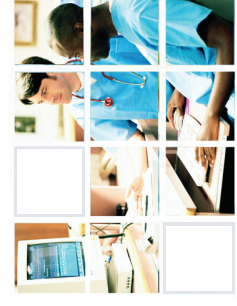

Doctors dictate through a phone, digital handheld, or other dictation system. After a one-time easy download of our Audio Collector software, the audio files are sent to ATSI automatically.

Our team of highly qualified medical transcriptionists process the work, review, edit and distribute the work back to your medical record management platform. These reports are guaranteed to be the highest industry standards when they are released for your review.

Our clients then have the ability through our platform to e-sign each document, automatically forward them via fax, or transmit via a secure digital network to any preapproved secure site.

Customer Viewer

Our unique customer interface, "Customer Viewer," is the best way to view all reports. From Customer Viewer you can do anything you want with your transcribed documents. You can track the dictation from beginning to end seeing each status from "Assigned to MT" to "Ready for Approval". Once the reports are complete, they are stored in our server for seven years.

ATSI is dedicated to providing our customers with not only quality reports in a short turnaround (4-24 hours), but we also provide them with the necessary tools they need to aid in the success of their own operation.

Our automatic report distribution is the key to providing medical reports to referring physicians, ordering physicians, surgeons, administrators, insurance and billing personnel, or satellite office facilities.
